

PATENT PENDING

Accessible Oncology Services, Delivered On-Site

Introducing Akumin AXIS Expandable Patient Solutions™, the world's first relocatable and expandable outpatient centers designed to address today's critical oncology demands. Akumin AXIS enables hospitals to maintain uninterrupted patient care, preserve referrals, and sustain revenue during equipment upgrades—or assess demand before investing in permanent facilities.

Integrated into Akumin's oncology services portfolio, Akumin AXIS provides hospitals with rapid, flexible deployment of advanced technologies and clinical expertise, delivering seamless patient experiences while efficiently expanding cancer care capabilities.

Unlock New Potential with Akumin AXIS Expandable Patient Solutions™

Seamless Installation

Equipment arrives pre-installed, enabling a quick go-live.

Relocatable Design

Interim placement to ensure uninterrupted radiation therapy during equipment installation.

Cost Efficiency

Reduces costs by eliminating the need for expensive brick-and-mortar investment.

Enhanced Patient Experience

Features a contemporary design with natural light.

Rapidly Expand Patient Access

Serve more patients without additional construction.

Introducing Akumin AXIS

A Breakthrough in Expanding Healthcare Access

Precise and Efficient Radiation Therapy Treatment

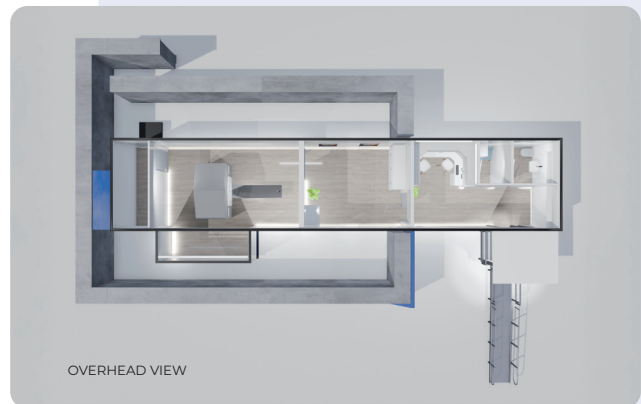

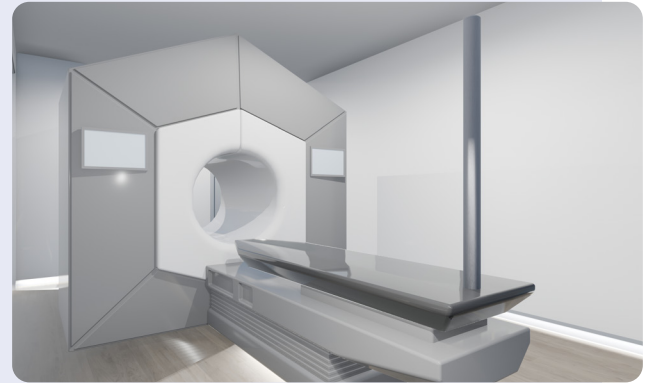

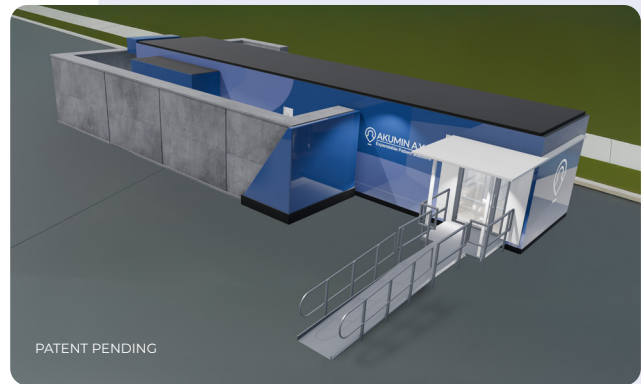

Featuring the LINAC-configured Varian Halcyon™, an FDA-approved linear accelerator, Akumin AXIS offers rapid deployment of safe, fast, and precise radiation therapy, enabling hospitals to deliver high-quality patient care without the high costs or delays of traditional brick-and-mortar construction.

Key Points About The Halcyon System:

- ✓ **Faster treatment times** - Compared to standard radiation machines, the Halcyon can deliver treatments much quicker due to its rapid gantry rotation and advanced technology.
- ✓ **Image-guided precision** - Utilizes cone-beam CT imaging to precisely target tumors while minimizing damage to surrounding healthy tissue.
- ✓ **Patient comfort features** - Designed with features like ambient lighting, reduced noise levels, and a comfortable treatment couch to enhance patient experience.
- ✓ **Advanced techniques** - Supports various radiation therapy techniques including volumetric modulated arc therapy (VMAT) and intensity-modulated radiation therapy (IMRT).

Why Partner with Akumin

As an industry leader with decades of experience, Akumin provides comprehensive support at every stage, from setup to fully managed operations, including staffing, billing, licensing, and administration.
